BRIDELA™ Fire Blankets (certified to BS EN 1869)

The BRIDELA™ **fire blankets** fully comply with the requirements of the British/ European standard BS EN 1869: 2019 (latest up to date standard) and have been independently tested and certified accordingly. Our fire blankets are available in a variety of standard sizes and have the added benefit of over 35 years of fire protection experience behind them.

Our fire blankets efficiently packaged in a choice of containers (red flexible P.V.C flat pack or red cylindrical rigid plastic (U.P.V.C) tube pack) for domestic or industrial use, these fire blankets , when draped over a fire, smother the danger by starving the fire of oxygen.

How they work: When draped over a fire, these fire blankets smother the fire by starving it of its oxygen supply. The BRIDELA™ fire blankets can also be used to wrap around a person whose clothes are on fire. Placing the blanket on the heat source will help put out the fire. However, it is very important to follow all health and safety procedures and call the fire brigade.

These fire blankets are suitable to use in a variety of different environments including kitchens, factories, offices, caravans, stores, schools, restaurants, hotels, boats, nursing homes, shops, laboratories, etc.

Benefits of using BRIDELA™ Fire Blankets:

- Product independently tested and certified to BS EN 1869: 2019 (latest up to date standard)
- Blanket made from silicone coated woven glass fibre fabric
- (totally asbestos-free)
- Containers can be wall-mounted
