BRIDELA™ Fire Blankets
(material tested to BS 476 parts 4 and 7)

The BRIDELA™ **fire blankets** are manufactured from woven glass fibre material which has been independently tested to British Standard 476 part 4 (non-combustibility) and part 7 (class 1 rating awarded for surface spread of flame).

The fire blankets are able to withstand temperatures of up to 550°C/1022°F and manufactured with the support of over 35 years of experience, so quality is guaranteed.

Efficiently packaged in a choice of containers (red flexible P.V.C. flat pack or red cylindrical rigid plastic (U.P.V.C.) tube pack), these fire blankets, when draped over a fire, smother the danger by starving the fire of oxygen.

The BRIDELA™ fire blankets can also be used to wrap around a person whose clothes are on fire.

Our fire blankets are suitable for use in a variety of different environments including factories, hospitals, offices, caravans, stores, schools, restaurants, hotels, boats, nursing homes, shops, laboratories, etc.

Benefits of using BRIDELA™ Fire Blankets:

- Glass fibre fabric independently tested and certified to BS 476 parts 4 and 7.
- Blanket made from woven glass fibre fabric.
- Asbestos-free.
- Containers can be wall-mounted.
- Easy and quick withdrawal of blanket from container.
- Competitively priced - **Please contact us for a quote**
- English and/or other language instruction labels available.
- Customer's own name label can be appended.
- Clear pictorial instructions.
