## Products

- ▶ Fire Blankets  
(BS EN 1869)
- ▶ Fire Blankets  
(BS 476 parts 4 and 7)
- ▶ Fire Extinguisher Covers  
& Hose Reel Covers
- ▶ Welding Blankets &  
Welding Curtains
- ▶ High Temperature  
Fabrics
- ▶ Silica Fabrics (1000°C)
- ▶ Fire Curtains and Smoke  
Curtains
- ▶ Neoprene Coated Glass  
Fibre Fabrics
- ▶ Weldstop Fabrics
- ▶ Insulation Jackets &  
Thermal Covers
- ▶ Barrel Insulation Jackets  
(plastics industry)
- ▶ High Temperature  
Sewing Threads
- ▶ Sewing Services

## High Temperature Fabrics

**A specialist range of high  
temperature fabrics/ fire  
resistant fabrics**

### Glass Industrial Fire Resistant Fabrics (uncoated) - 1 & 2

Having a temperature resistance of up to  
550°C/1022°F

### Glass Fibre Fabrics (coated) - 3, 4, 5, 6, 7, 8

Glass Fibre Fabrics have a high temperature  
resistance combined with special coatings to  
provide protection against water, vapours, acids,  
abrasions, etc., including neoprene (3), aluminised  
foil (4), silicone (5, 6 & 7) and PTFE (8)

### Glass Fibre Fabrics (specially treated/higher temperature resistance) - 10 & 11

Special treatments give this industrial glass fibre fabrics higher temperature resistance from 600°C/1112°F up to 1000°C/1832°F. Our glass fibre fabrics are suitable for welding operations (11) and fire cavity barriers

### Silica Fire Resistant Fabrics - 13

A range of silica fabrics offering high temperature resistance up to 1000°C/1832°F with a high flexibility/ drapeability. Suitable for welding blankets

### One and two hour rated fire resistant fabrics

Also available are specialist high temperature fabrics that have either a 1 hour or 2 hour integrity rating (indicative tests passed to BS 476 parts 20 and 22). These fabrics can be utilised for fire curtains, smoke curtains, fire cavity barriers, etc.

- If you have an individual requirement for a high temperature fabric, a fire resistant fabric or Glass fibre fabric which you do not see amongst this selection, please provide details and we will be more than willing to try and match your specification
- All high temperature fabrics, fire resistant fabrics and Glass Fibre Fabrics can be provided direct on a roll, in various roll widths and lengths
- Alternatively, any of our high temperature fabrics, fire resistant fabrics and Glass fibre fabrics can be taken and stitched into specific sizes/shapes to produce finished products such as:
